

2015 - UP SEATBELT OVERRIDE

Thank you for purchasing XTC Motorsports Seatbelt override. All 2015 Polaris vehicles are now equipped with a seatbelt safety switch. The factory computer system knows when the safety belt is not latched and limits the car to 5 MPH. When removing the factory safety belts and installing 4 or 5 point harnesses it will limit the car to the 5MPH. This plug and play system plugs into the car and bypasses the system. The Remote version has a switch attached so that you can put the car in safe mode for security. Just hide the switch where you only know, and the car will be limited to 5 MPH.

For more details on installation go to www.xtcinstall.com

Please read the instructions fully and familiarize yourself with the components before starting the install.

Quick Install Guide.

1. Remove Seats.
2. Plug override into car harness, go to step 7 if unit does not have the remote option.
3. Remove center plastic tunnel.
4. Drill a 3/4" hole in the plastic tunnel in an inconspicuous place.
5. Install Switch in hole.
6. Attach the wires from adapter plug onto switch.
7. Reinstall console and seats.
8. Verify operation. Start the car and verify that it has full power.
9. If purchased with the remote switch, test in both positions to verify limited power and full power.
